

Adamski Ryszard, Tura Krzysztof¹⁾

**Short distance stabilization in the treatment
of spine lesions and injuries-in own material**

*(Stabilizacja krótkoodcinkowa w leczeniu schorzeń
i urazów kręgosłupa -w materiale własnym)*

Authors presents their own experiens in application of DERO system as internal stabilisation of the spine. Six patients were treated at the Orthopaedic Department of City Hospital in Toruń - in five cases because of fracture injury, in one

casebecause of neoplastic process. Early results are promising but small number of patients and short follow-up period permit only to present a preliminary report.
